## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In line 2 of claim 9, wherein clock activity is monitored by counting divided multiples of the clock lacks enablement. The specification does not explain how the clock activity is monitored by counting divided multiples of the clock and how a clocked modulator would have been used to monitor the clock activity. Without some indication of how to monitor the clock activity using such clocked modulator, one skilled in the art would not be able to make and/or use the claimed invention without undue experimentation.
